Journal of Microscopy

Patron: HER MAJESTY THE QUEEN

Officers and Council 1982–83

President: A. W. ROBARDS

Vice-Presidents: J. R. GARRETT
H. PILLER

Executive Hon. Secretary: GILLIAN BULLOCK

Hon. Treasurer: B. C. COWEN

Hon. Secretary (Education): D. J. JOHNSON

Ordinary Members of Council:

M. G. DOBB
P. ECHLIN
D. A. HEMSLEY
S. J. HOLT
A. HOWIE
D. H. JACK
T. JOHNSON
HELEN LAIRD
B. D. LAKE
J. V. P. LONG
G. W. LORIMER
J. S. PLOEM

Hon. Joint Editors:

P. ECHLIN
H. J. G. GUNDERSEN
C. V. HOWARD
D. C. JOY
G. W. LORIMER
A. J. SAUBERMANN

Administrator: P. G. FLEMING

Contents of Vol. 130

Part 1

KARLHEINZ BACHHUBER and DIETER FRÖSCH. Melamine resins, a new class of water-soluble embedding media for electron microscopy 1

H. J. TANKE, A. M. J. VAN DRIEL-KULKER, C. J. CORNELISSE and J. S. PLOEM. Combined flow cytometry and image cytometry of the same cytological sample 11

H. SILYN-ROBERTS. The pore geometry and structure of the eggshell of the North Island brown kiwi, *Apteryx australis mantelli* 23

K. WRIGHT and B. KARLSSON. Topographic quantification of non-planar localized surfaces 37

J. P. RIGAUT, P. BERGGREN and B. ROBERTSON. Automated techniques for the study of lung alveolar stereological parameters with the IBAS image analyser on optical microscopy sections 53

SINIKKA ESKELINEN and PEKKA SAUKKO. Effects of glutaraldehyde and critical point drying on the shape and size of erythrocytes in isotonic and hypertonic media 63

W. T. PERRIE and D. M. WEBB. The correlation of light and electron microscope observations 73

OLIVIER L. REYMOND and JEREMY D. PICKETT-HEAPS. A routine flat embedding method for electron microscopy of microorganisms allowing selection and precisely orientated sectioning of single cells by light microscopy 79

P. W. J. LINDERS, A. L. H. STOLS and A. M. STADHOUDERS. Calibration of transmission electron microscopic mass determination using objects with known mass distribution 85

M. TSUJI and R. ST. JOHN MANLEY. Determination of the illuminating angle and defocus spread in transmission electron microscopy 93

M. BOYSEN, P. F. MARTON, L. PILSTRÖM, L. A. SOLBERG and T. TORP. A simple and efficient method for objective discrimination between pseudostratified, metaplastic and dysplastic nasal epithelium 99

Short Technical Notes

S. R. STOCK and J. E. HILLIARD. An investigation of the degree of randomness in the dispersion of point features (triple junctions) in a plane 107

H. SILYN-ROBERTS. BSE Z contrast imaging of uranium stained pores in the avian eggshell 111

B. C. DEER. A loop for the transfer of thin tissue sections 115

AHMAD R. SAFA and MICHAEL T. TSENG. Isolation and preparation of colonies grown on soft agar for ultrastructural investigation 119

ANN M. C. BURGESS. Enhancement of contrast in living and fixed specimens by the use of fibre optics 123

Book Reviews 125

Rapid Publication

OLIVER C. WELLS. Method for measuring the field from a magnetic recording head in the scanning electron microscope RP1

Part 2

MICRO 82: High Resolution Electron Microscopy and Analysis

David J. Smith, R. A. Camps, L. A. Freeman R. Hill, W. C. Nixon and K. C. A. Smith. Recent improvements to the Cambridge University 600 kV High Resolution Electron Microscope 127

S. B. Newcomb, David J. Smith and W. M. Stobbs. The application of high resolution electron microscopy to the study of oxidation 137

J. C. H. Spence and J. Taftø. ALCHEMI: a new technique for locating atoms in small crystals 147

I. P. Jones and A. W. Nicholls. Electron trajectory-linked phenomena in thin foil X-ray microanalysis 155

P. J. Statham. Prospects for improvement in EDX microanalysis 165

A. J. Bourdillon, D. J. Hall, C. J. Morrison and W. M. Stobbs. The relative importance of multiple inelastic scattering in the quantification of EELS 177

W. O. Saxton, David J. Smith and S. J. Erasmus. Procedures for focusing, stigmating and alignment in high resolution electron microscopy 187

R. Hull, David J. Smith and C. J. Humphreys. A high-resolution electron microscopic study of defects in sodium B″-alumina 203

D. J. Hall, P. G. Self and W. M. Stobbs. The relative accuracy of axial and non-axial methods for the measurement of lattice spacings 215

N. G. Wrigley, Elaine Brown and R. K. Chillingworth. Combining accurate defocus with low-dose imaging in high resolution electron microscopy of biological material 225

S. B. Newcomb and W. M. Stobbs. The transmission electron microscopy of oxide scale formation on Fe–Ni–Cr alloys 233

L. D. Marks and David J. Smith. HREM and STEM of defects in multiply-twinned particles 249

Rapid Publication

G. Cliff. Condenser aperture misalignment and solute profile asymmetries in STEM X-ray microanalysis RP3

Part 3

MICRO 82: High Resolution Electron Microscopy and Analysis

E. P. Butler. The study of high temperature oxidation by transmission electron microscopy 263

S. E. Fielding and W. M. Stobbs. Dislocation structures in fatigued polycrystalline stainless steel 279

M. M. Hamdy, B. Noble and R. B. Waterhouse. The metallographic characteristics of fatigue cracks in the titanium alloy IMI829 at 400°C and 600°C 289

B. R. Lawn, B. J. Hockey and H. Richter. Indentation analysis: applications in the strength and wear of brittle materials 295

K. D. van der Mast. Field emission, developments and possibilities 309

B. Bauer, H. Schwarz and Nguyen van Thanh. Digital image processing of combined SEM and EDX signals 325

I. M. Hutchings. Introduction to the microscopy of erosion 331

A. W. Agar. The use of a digitizing frame store in microscopy 339

M. G. S. Naylor and T. F. Page. Microstructural studies of the temperature-dependence of deformation structures around hardness indentations in ceramics 345

P. E. Donovan and W. M. Stobbs. A method for mapping localized displacement fields in boundaries 361

P. Doig and P. E. J. Flewitt. The role of specimen and instrumental parameters in STEM-EDS X-ray microanalysis of thin foils 377
